Maja Smrekar, Aaron Joseph, Fahrad Mehta

CREATE YOUR WORLD
Future Festival of the next Generation
31.8 - 3.9.2011

visuāls

The BioCyberKidzz workshop has been developed as a result of collective brainstorming of many individuals and communities that are devoting their rich experiences in creating the alternative crossovers between arts and science. The dialogues have been encouraged by HACKTERIA and Swiss Mechatronic Art Society movements as the core initiatives for many open art & science projects which are establishing new meanings to DIY. Within this context the acknowledgments go to Yashas Shetty, Nur Akbar Arotullah/HONF, Julian Abraham - Togar/HONF and KOELSE for executing new funky approaches to fermentation/ biotechnology. Sachiko Hirose and Brian Degger for sharing with us their creative perspectives on microbiology as well as Mackenzie Cowell for introducing us his original way of understanding the field of

prohelvetia

Jonas Ohrstom/anorg.net by lending us his vehicle which has an amazing ability to serve us as a mobile lab and a flat at the same time as well as Cirkulacija2 and Ljudmila for sharing with us their inspirational environments where our ideas could be executed to its final point. We are interested in introducing those vivid "invisible" worlds that are, as if they are not seen, very much present in our every day life.

Create your world by establishing your own point of view at the "invisible" life around us! . .
